ENGLISH PROFICIENCY
24. IPT ................. IDEA Proficiency Test

LOCAL ASSESSMENT
25. ACP .................. Dallas ISD Assessments of Course Performance
Notes

2016-17 SCHOOL SUMMARY

• Student percentages are computed as the percentage of total student enrollment.
• Additional statistics are available in ENROLLMENT and TEACHER reports.
• Race/ethnic categories are based on the latest federal standards for ethnicity and race reporting, though some categories have been combined due to small group sizes. Students reporting their ethnicity as “Hispanic” are not counted in any race category.
• Teacher statistics are not available for programs within a campus or for “zoned only” students. See statistics for whole campus in main campus packet.

ENROLLMENT

• Statistics are based on the school's enrollment at the end of the fifth six-weeks grading period.
• “New” students were new to the district in 2016-17. They are counted as new if not enrolled in a district campus before the last day of the 2015-16 school year.
• The “retention rate” is the percentage of students in the same grade at the end of the fifth six-weeks grading period for both 2015-16 and 2016-17.

ATTENDANCE

• Statistics are based on student attendance through the end of the sixth six-weeks grading period (the end of the school year).
• “Average daily membership” is the total number of school days students were SCHEDULED or ENROLLED divided by the number of school days in the year.
• The “average daily attendance” number (N) is the total number of school days students were IN ATTENDANCE divided by the number of school days in the year. The “average daily attendance” percentage (%) is the average attendance rate. For each student, the number of days attended is divided by the number of days enrolled. This rate is then averaged across students.
• The number (N) of “yearly transactions” is the total number of transfer and withdrawal transactions in the school year. The percentage (%) is the number of transactions divided by “average daily membership,” which gives (on average) the percentage of the membership associated with a transaction.
• “Continuously enrolled” students are enrolled and in attendance for a minimum number of instructional days in at least one course at the school between the beginning of the school year and the first day of the main STAAR testing period. The minimum number varies depending on the school year's calendar.
• The “stability rate” is the number of continuously enrolled students divided by “average daily membership.”
STATE OF TEXAS ASSESSMENT OF ACADEMIC READINESS (STAAR)

• Cells marked with an asterisk (*) indicate five or fewer students were tested. Blank cells indicate no students were tested.
• Student group assignments are from the district's Public Education Information Management System (PEIMS) submission to the TEA.
• STAAR statistics for years prior to 2016-17 include results from all STAAR tests (STAAR, STAAR A, and STAAR L) for comparability to statistics beginning 2016-17, when STAAR A and STAAR L were discontinued.
• Performance standard labels have changed. “Approached Grade Level” is comparable to Level 2: Satisfactory (2015-16 standard). “Met Grade Level” is equivalent to Level 2: Satisfactory (final standard). “Mastered Grade Level” is equivalent to Level 3: Advanced. Statistics for a performance level (such as “Percentage Approached Grade Level”) include all scores at or above that level.
• Statistics by reporting category are averages for all students (across student groups and genders).
• “Average percentage correct” is computed as follows: For each student, divide number of items correctly answered by total number of items in test section, then average resulting percentages across all students. For short answers on EOC English tests, an “average rating” is presented; STAAR EOC short answers are rated on a scale of 0 to 3. For written compositions on writing tests, “average score points” is presented. Additional details provided in report footnotes.
• Grade in report is grade level of assessment, not student's grade level. For example, grade 7 students in Pre-AP math or science courses are assessed with the Grade 8 Math or Grade 8 Science assessment. These students' scores are reflected in the row for “Grade 8”.
• Statistics for SSI grades 5 and 8 are based on scores cumulative through students' second administrations.

DALLAS ISD ASSESSMENTS OF COURSE PERFORMANCE (ACP)

• Cells marked with an asterisk (*) indicate five or fewer students were tested. Blank cells indicate no students were tested.
• ACPs are semester exams administered in grades K-12. Not all courses have ACPs. In secondary grades, ACP scores account for a portion of students' semester grades (10% at middle and 15% at high). “Average course mark (no ACP)” is computed from semester grades before factoring in ACP scores. In elementary grades, ACP results account for 5% of students' semester grades for core courses; course-grade statistics are not reported in packets for elementary grades.
• Raw scores on the ACPs (percentage of items correct) are scaled each year to maintain similar annual passing rates for the district.
• A scale score of at least 70% is required to pass an ACP. For grade levels with numeric grading, a course mark of at least 70% is required to pass a course.
• Statistics are computed separately for Semester 1 and Semester 2 tests; time of administration during the school year is not relevant. Results from tests written for different school years are not combined.
