<tbody>
<tr>
<td><strong>Emergency Closure due to COVID-19 Pandemic</strong></td>
<td>Statistics in this report were updated to reflect the 2019-20 school year WHERE POSSIBLE. In most cases, new data were not available to create updated statistics due to the emergency closure in March 2020. Please note carefully which school years are reflected in each section. If new statistics could not be created for 2019-20, all prior-year statistics were left in place from the previous School Profile. In the 2020-21 profile, attendance statistics are based on data collected through March 13, 2020, the last instructional day before the emergency closure.</td>

### Accountability Rating System for Texas Public Schools

<table>
<thead>
<tr>
<th>Metric</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>State accountability rating</strong></td>
<td>Schools receive scaled scores in four domains (Student Achievement, Student Progress: Academic Growth, Student Progress: Relative Performance, and Closing the Gaps) and a single scaled score across the three domains from the TEA. Dallas ISD opted into the state's Local Accountability System, which adds domains to Dallas ISD schools' accountability ratings. The additional local domains are Academics (measured by the school's prior-year SEI), Culture and Climate (measured with the staff climate survey and parent/guardian survey), and Student Engagement (measured by a confidential student experience survey and extra-curricular participation). As with state domains, each local domain receives a scaled score, and there is a single scaled score across the three local domains. Scaled scores range to 100. The state scaled score and local scaled score are averaged to compute the school's overall accountability score and grade. Based on the state domains only, schools can earn distinctions from the TEA for student achievement in math, reading, science, and social studies; top 25% (among comparable schools) in student progress; top 25% in closing performance gaps; and postsecondary readiness.</td>
</tr>
</tbody>
</table>

### School Effectiveness Index

<table>
<thead>
<tr>
<th>Metric</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SEI</strong></td>
<td>A measure of performance on assessments that is relative to other Dallas ISD schools. The SEI isolates a school's effect on student outcomes by controlling for differences the school cannot control, such as socio-economic status, neighborhood characteristics, and prior-year academic levels. A large change in one year, whether up or down, will typically be followed by a move in the opposite direction. This is expected based on the statistical model used for SEI; it is an example of the concept of &quot;regression to the mean.&quot;</td>
</tr>
</tbody>
</table>

### Campus Climate Survey

<table>
<thead>
<tr>
<th>Metric</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Percentage positive responses</strong></td>
<td>Surveys conducted November and May. Positive responses include Agree and Strongly Agree. Other responses included Disagree, Strongly Disagree, and Neutral. Campuses with multiple TEA numbers have results only for the campus as a whole; results are repeated on each profile.</td>

### State of Texas Assessment of Academic Readiness (STAAR)

<table>

School's statistics based on results from students in the accountability subset. District statistics are based on grade levels at the campus. State statistics are all students tested across grades. Students meeting grade level standard have a high likelihood of success in the next grade or course but may still need some short-term, targeted academic intervention.</td>
</tr>
<tr>
<td>Percentage mastering grade level standard</td>
